Evoca Group earns A- CDP Climate Change rating, joining global climate leaders

Valbrembo (Bergamo) – Evoca Group has secured an A- rating in the CDP Climate Change questionnaire, placing the Group on the Carbon Disclosure Project’s “Leadership” list. The result positions Evoca among the world’s most advanced companies in climate management, recognising the strength of its strategy, governance, risk management and performance tracking.

The A- score provides independent, external validation of Evoca’s climate journey and confirms the effectiveness of its approach to measuring and managing climate impact. CDP is widely regarded as a global benchmark for environmental disclosure and is used by investors, financial institutions and procurement teams to assess the credibility and ambition of corporate climate strategies. Its rigorous, comparable framework evaluates disclosure quality, concrete action and overall ambition, with scores ranging from A to D-.

This recognition reflects a structured, science-based pathway supported by robust operational tools. Evoca has set emissions-reduction targets validated by the Science Based Targets initiative (SBTi) and aligned with the 1.5°C scenario. These targets are embedded in a product stewardship approach that steers design towards highly innovative solutions with reduced environmental effects across the entire product life cycle.

Emissions are measured and monitored through a certified internal system, enabling clear prioritisation and delivery of reduction actions. In parallel, the Group conducts structured climate risk assessments and continues to strengthen environmental monitoring across its value chain, improving the consistency, reliability and quality of data and outcomes.

“This recognition confirms that we are working with rigour and transparency,” said Giusi Bonini, Chief Sustainability Officer. “At the same time, it reinforces that effective climate management demands continuity – better data, stronger processes and consistently informed decisions over time.”

Evoca will continue to embed its climate strategy into industrial and product decisions, with the goal of reducing its footprint, strengthening resilience and creating long-term value for stakeholders.

Evoca Group is a world-leading producer of professional coffee machines and vending machines for out-of-home consumption, anchored in more than 100 years of coffee and vending heritage. Together, our broad portfolio of brands offers a complete range of products to bring great coffee and vending products to our 10,000 customers - serving consumers across hotels, restaurants, office buildings, public spaces, and more.
