Evoca Group puts *Brewing Connections* at the heart of 2025 Sustainability Disclosures

Valbrembo, Bergamo – Evoca Group publishes its 2025 Sustainability Disclosures, built around the theme *Brewing Connections*, a concept inspired by coffee’s ability to bring people together and reflecting the company’s commitment to creating value through stronger connections with customers, partners, people, products and the entire ecosystem.

This year’s publication spotlights how sustainability is becoming an increasingly integral part of Evoca’s business, shaping product innovation, climate action, governance and employee engagement in turn creating customer value and long-term growth.

Among the key achievements, 50% of Group revenue came from products that meet Evoca’s sustainability standards. The company also reduced Scope 1, 2 and 3 greenhouse gas emissions by 40% compared with its 2022 baseline and launched an ISO 14067:2018-certified Product Carbon Footprint tool, granting customers greater transparency and insights into product-related environmental performance.

“Brewing Connections reflects how we unite people, technology, customers and sustainability to create lasting value,” said Norman Rafael, CEO of Evoca Group. “By strengthening these connections, we continue to drive innovation, transparency and sustainable growth across our business and our value chain.”

The publication also confirms continued recognition from leading sustainability rating organisations, including EcoVadis, Sustainalytics, CDP, S&P and ISS, further reinforcing the strength and credibility of Evoca’s sustainability strategy.

Documents are available on Evoca’s website: <https://www.evocagroup.com/en/sustainability/our-reports>
